May 6, 2006

IMS recommends solid core transformers (CT's) for revenue grade billing. Our 100A & 200A color coded CT's (to the right) assist with correct installation by indicating phase monitored. Split core CT's (to the right) are also available upon request for applications where power cannot interrupted during installation. Our 100A, 200A, and 400A split core models offer a 1% accuracy. All IMS 100A and 200A solid core and 100A, 200A, 400A split core CT's have built in open circuit protection which prevents high voltage from appearing on secondary leads if wires become disconnected while CT is under load.
