

Quality and reliability is our tradition

KYORITSU

POWER QUALITY ANALYZER KEW 6315

*Simultaneous recording of **Power & Power Quality** measurements in one survey.
The perfect tool for **Energy Saving** and **Power Quality** control.*

- **Simultaneous Power & Power quality measurements**

Power/ Harmonics/ Waveform/ Power quality are recorded at all CHs. (Voltage: 3ch, Current 4ch)

- **Helpful support functions**

Quick Start Guide, Wiring check and Sensor detection for easy and reliable measurement

- **Measurement with high accuracy**

Guaranteed accuracy: $\pm 0.3\% \text{rdg}$ (energy),
 $\pm 0.2\% \text{rdg}$ (voltage/ current)

Complies with the International Standard

IEC61000-4-30 Class S and the European Standard EN50160

- **Remote monitoring on PC and Android device**

Remote checking of measurement *in real-time* is possible via Bluetooth communication. Recorded data can be saved in the supplied **SD card**.

EN50160 report can be generated after survey by PC software.

- **Various Clamp Current Sensors**

Various types of clamp and flexible sensors are available: from 1000mA Range up to 3000A Range and Earth leakage measurements

- **Energy consumption check on site**

Trend and demand graphs for easy recognition.

TFT color display with high resolution.

- **IEC61010-1 CAT IV 300V, CAT III 600V, CAT II 1000V**

Easy-to-use setting to simultaneous power energy and power quality recordings

List

Zoom(8-split)

Zoom(4-split)

Trend

- Measures instantaneous / average / min / max for voltage, current, active / reactive / apparent power, PF (cosφ) and line frequency all on one screen.
- The recording time for these parameters can be set from 1 second up to 2 hours in several steps.
- Trend of all main parameters and customized Zoom functions.
- Function to define size of capacitor banks of PF correction unit.

Integration value

- The display will list the active / reactive / apparent energy in total and for each phase consumed (or generated in case of co-generation like solar panels, etc).
- The elapsed time is also shown on the same display screen.

Demand

Measurement

Change in specific period

Demand change

- To support demand control, present energy usage and estimated value are displayed on a graph while recording max demand value and the occurred time.

Measures voltage swells / dips / interruptions / transients and inrush currents that may indicate a weak power distribution system. Such phenomena may damage or reset devices. KEW 6315 can catch swells / dips / interruptions and inrush currents based on half cycle (10 ms @ 50Hz or 8.3ms @ 60Hz) TRMS. All necessary data is displayed by pressing one key.

Swell

Swell is an instantaneous voltage increase, most of the time originated by upstream power line failure or switching OFF large

Windows software for data analysis and setting via USB port

- Automatic creation of graph and list from recorded data.
- Uniform management of setting and recorded data acquired from multiple devices.
- Data can be expressed in crude oil and CO₂ equivalent values in the report.

<System requirements>

- OS : Windows® 7/8/10
- Display : XGA (Resolution 1024×768 dots) or more
- Hard-disk : Space required 1Gbyte or more
- Other : With CD-ROM drive and USB port, .NET Framework (3.5 or more)

*Windows® is registered trademark of Microsoft in the United States.

Real time and Remote measurements

- Measurements can be graphically displayed on Android devices or PC in real-time via Bluetooth communication.

*Bluetooth is a registered trademark of the Bluetooth SIG, Inc.
Android is a registered trademark of the Google Inc.

USB Terminal

Digital Output Terminal

- Open Collector Output (1ch)

Analogue Input Terminal

- 2ch DC100mV / 1000mV, 10V. To record additional parameters (i.e. Lux, Temperature, Humidity, etc.)

SD card Interface

- SD cards up to 2GB can be used

Possible recording time
When the 2GB of SD is used:

Interval	REC item	
	Power	+ Harmonics
1sec	13days	3days
1min	1-year or more	3months
30min	10-year or more	7-year or more

Data of power quality events are not considered to estimate the possible recording time. The max possible time will be shortened by recording such events.

Waveform

- Displays voltage and current on each Ch by waveform.
- Scales of voltage/current axis and time axis are selectable, and also full-scale function for automatic scaling is available.

Harmonics Analysis

Graph

V	V1	V2	V3
1	100.0	100.0	100.0
2	16.2	10.5	5.6
3	54.7	29.8	48.8
4	0.7	5.7	2.4

7	6.0	1.5	8.9
8	0.4	1.5	0.9
9	7.9	4.3	4.8
10	1.0	0.5	1.0

List

- Graphic display of harmonic components up to 50th order for voltage, current and power in total and for each phase.
- List display of harmonic content, rms value and phase angle of each order.
- Can analyze harmonic currents that may contribute to damage capacitor banks for PF correction, overheating transformers / neutral conductors / cables, unwanted tripping of breakers.

Dip

Dip, as the opposite of a swell, is a instantaneous voltage decrease, most of the time caused by switching ON large load e.g. motors or by downstream power line failure.

Interruption

Interruption is a power line cut-off from any source of supply. It can be caused by a fault in a power line, which causes switch gear to open.

Transients/Over Voltage (Impulse)

Transient is a very fast and momentary voltage increase that can seriously damage devices connected to a power line. It may be caused by electrical switching events such as instable contacts of relays, tripping of breakers but also by lightning. Kew 6315 can catch Transients from 2.4 μs.

Inrush Current

Inrush current is a surge current that happens when

Flicker

Designed to meet IEC61000-4-15

Flicker is a phenomenon giving an impression of unsteadiness of visual sensation induced by periodic voltage changes caused by fluctuating loads when using: arc furnace, spot welder, crane, excavator, etc..

NEW

Can you close your distribution board door during surveys?

The KEW6315 facilitates safe testing by being extremely compact and with two clever option extras: a magnetic case(9132) for attaching it to the sides of metal enclosures and a power supply adaptor(8312) which takes the power for the instrument from the supply being measured.
